

SASPEN NEWS

The past few months have been a dynamic and productive time for SASPEN, with several exciting initiatives and events. We hosted a highly successful mini-symposium titled Advancing Nutritional Strategies in Surgical Care via the MedTalkz online platform. This CPD-accredited event featured six internationally recognised speakers and explored perioperative nutrition across diverse patient populations. We also continued our popular PM Ward Rounds series with two well-attended sessions this quarter: an acute oncology case study in April and a paediatric case study in May.

Looking ahead, we are excited to be in the early stages of developing SASPEN's own set of clinical practice guidelines tailored for the South African ICU context - an ambitious project, so watch this space!

SASPEN – Q2

Don't forget - registration is still open for the upcoming CCSSA/SASPEN Congress, taking place from 14–17 August at the Durban ICC. Abstract submissions are currently open, with a deadline of 15 June 2025. SASPEN recently ran an exciting giveaway, offering two lucky members the chance to win full registration to the Congress. The competition closed on 31 May, and we look forward to welcoming the winners at Congress!

Finally, a reminder that our new CPD portal is live on the SASPEN website, where you can earn clinical and ethics CEU points directly online. Visit www.saspn.co.za to start earning today.
